

New knowledge from BPA!

We are seeing Employee Engagement scores drop sharply to 45% in the first 6 months of 2022.

There has been a steady erosion during the first 2 years of Covid, dropping 1% in year 1 and 3% in year 2. Now, it has dropped another 3% in just 6 months.

The drop in Employee Engagement is getting faster, so managing it is becoming more urgent, particularly in such a tight labour market.

Employee engagement dropping sharply in 2022

*Percentages are of solid engagement (excluding 'swinging voters' and 'disengaged employees').
